

1. Question:

*We understand that the Primary Prequalification Classification for the M-43 project is:
Roadway Rehabilitation and Rural Freeways*

And the Secondary Prequalification Classifications are:

*Geotechnical Engineering Services
Landscape Architecture
Municipal Utilities
Traffic Signal Design
Traffic Signal Operations*

The RFP also lists that the consultant will be responsible for maintaining traffic, pavement markings and non-freeway signing.

Question: Should the following prequalifications be added to the secondary classification list in the RFP?

*Maintaining Traffic Plans and Provisions
Permanent Pavement Marking Plans
Permanent Non-Freeway Traffic Signing Plans*

Answer:

Yes the following Secondary Classifications should be added to the Prequalification list in the RFP.

Maintaining Traffic Plans and Provisions
Permanent Pavement Marking Plans
Permanent Non-Freeway Traffic Signing Plans

2. Question:

We have reviewed the request for proposal on the referenced project and have the following question:

1. The Secondary Prequalification of Traffic Signal Operations is listed but currently No vendors are prequalified at this time (per MDOT Web Site 2/17/05). Is the prequalification for Traffic Signal Design considered an equivalent?

Answer:

The project will only require the Prequalification of Traffic Signal Design. The following Secondary Classifications should be deleted from the Prequalification list in the RFP.

Traffic Signal Operations
